This publication is the first report from the OECD ’ s Teaching and Learning International Survey (TALIS). It provides quantitative, policy-relevant information on the teaching and learning environment in schools in 23 countries.

This new teacher resource will help beginners, as well as experienced substitutes, survive the challenges of middle school. It includes the dos and don'ts of subbing, paperwork responsibilities, reproducible forms for recording schedules, and much more.

Just as successful athletes must identify strengths and weaknesses, set goals, and engage in focused practice to meet their goals, so must teachers. Learn how to combine a model of effective instruction with goal setting, focused practice, focused feedback, and observations to improve your instructional practices. Included are 280 strategies related to the 41 elements of effective teaching shown to enhance student achievement.

The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's The Prize and Dana Goldstein's The Teacher Wars, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But The Knowledge Gap isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

First published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

Learn the five things every teacher can do to design and deliver effective instruction for the culturally, linguistically, and academically diverse 21st century classroom.

What is the purpose of education? What kind of people do we want our children to grow up to be? How can we design schools so that students will acquire the skills they'll need to live fulfilled and productive lives? These are just a few of the questions that renowned educator Dennis Littky explores in The Big Picture: Education Is Everyone's Business. The schools Littky has created and led over the past 35 years are models for reformers everywhere: small, public schools where the curriculum is rich and meaningful, expectations are high, student progress is measured against real-world standards, and families and communities are actively engaged in the educational process. This book is for both big "E" and small "e" educators: * For principals and district administrators who want to change the way schools are run. * For teachers who want students to learn passionately. * For college admissions officers who want diverse applicants with real-world learning experiences. * For parents who want their children to be prepared for college and for life. * For students who want to take control over their learning . . . and want a school that is interesting, safe, respectful, and fun. * For anyone who cares about kids. Here, you'll find a moving account of just what is possible in education, with many of the examples drawn from the Metropolitan Regional Career and Technical Center ("The Met") in Providence, Rhode Island--a diverse public high school with the highest rates of attendance and college acceptance in the state. The Met exemplifies personalized learning, one student at a time. The Big Picture is a book to reenergize educators, inspire teachers in training, and start a new conversation about kids and schools, what we want for both, and how to make it happen.

Teaching English Language Learners: Content and Language in Middle and Secondary Mainstream Classrooms provides a reader-friendly guide to implementing and assessing high-level, content-area instruction for English Language Learners. Beginning with an overview of second language acquisition and the cultural variables that impact teaching and learning, authors Michaela Colombo and Dana Furbush go on to detail planning strategies, units and lessons. Practical in nature, this text focuses on the areas where it is often most difficult to make content comprehensible and build academic language skills: middle and secondary math, English language arts, history, and science. Teaching English Language Learners will provide pre- and in-service teachers with a foundational understanding of how to purposefully structure, build, and present effective lessons for English language learners in mainstream, content-area courses. Key Features Includes an entire chapter on differentiating summative assessments for varying levels of English language proficiency, showing readers how to plan daily lessons with clear objectives and assessments Provides sample lessons from content-area experts in each chapter of Part II, along with mini lessons specifically dedicated to building language Incorporates "Review, Reflect, Apply" activities in each chapter promoting reader reflection, journaling, and discussion; and encouraging students to stop and check for understanding before proceeding Teaching English Language Learners: Content and Language in Middle and Secondary Mainstream Classrooms is appropriate for courses entitled English Language Learners in Secondary Classrooms, Methods of Sheltered Content Instruction, Content-Based ESL, Teaching and Assessing ELL in Content Areas, and ESL for Mainstream Teachers. This book is about designing the effective classroom curriculum. The authors argue that an effective classroom curriculum should be the goal of every teacher in every classroom around the world: effective that is for every student, not just those who find school easy! But how does one go about designing a classroom curriculum that is effective? What are the essential ingredients and how should these ingredients be organised for teaching effect? What role does Technology play in such classroom plans? In this book Lynch, Smith and Howarth provide an insight into these questions by providing a text that focuses on classroom teaching diagnostic and design strategies. Their intent in writing such a book is to enable the classroom teacher to develop, teach and assess a classroom curriculum where learning success for all students is the central goal.This text is compulsive reading for the teacher who wants to make a difference in their classrooms.

There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, How People Learn: Brain, Mind, Experience, and School: Expanded Edition was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. How People Learn II: Learners, Contexts, and Cultures provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. How People Learn II will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.
