For Ellen, faith was nonexistent until faith was all she had to cling to. After 24 years together, life partners, Ellen and Paul were married nine months before his passing to the spirit world. When treatments ran out

for Paul's dreaded health issues, he confided to Ellen that he was very tired of exotic drugs, daily doctor visits, and feeling terrible. He wanted peace and comfort. So together, they decided hospice was not the only choice but the best choice. Before making the transition to his final reward and eternity, they shared his time going over memorabilia, listening to favorite Big Band music, watching movies, laughing, and telling stories about seashells. Ellen read his Tin Can Sailor magazines aloud, and much time was spent in expressions of love. Ellen stood guard 24/7. Sadly, they were wrong to believe family and lifelong friends would be their support system. Instead, many angels in human form stepped in to give support,

camaraderie, and comfort. Ellen, an outspoken believer in science, was presented numerous miracles; miracles that science could not explain. These miracles and the subtle comfort she felt through prayer led to a profound epiphany in belief. The smell of English leather permeating the night air"" Paul 's brother used that brand of cologne, but he had been dead for several years. Another incident, Ellen being violently shaken awake, just in time to untangle her beloved from the blanket and side rail. No one else was in the house, so whose hand shook her shoulder? This is Ellen and Paul's intimate hospice journey. The lessons learned are being shared with the deepest of intentions of easing the load of those

sinner. His life is dedicated to finding joy in each hedonistic moment whilst simultaneously building a legacy to be proud of; however, it isn't that easy. As he hurtles towards the end of his days, will the consequences of his actions serve to sabotage his lofty plans or will he realise that finding the perfect moment is the ultimate success? Just Under Two Seconds is part of the Connected Collective.

Dynamics systems (living organisms, electromechanical and industrial systems, chemical and technological processes, market and ecology, and so forth) can be considered and analyzed using information and systems theories. For example,

adaptive human behavior can be studied using automatic feedback control. As an illustrative example, the driver controls a car changing the speed and steering wheels using incoming information, such as traffic and road conditions. This book focuses on the most important and manageable topics in applied multivariable control with application to a wide class of electromechanical dynamic systems. A large spectrum of systems, familiar to electrical, mechanical, and aerospace students, engineers, and scholars, are thoroughly studied to build the bridge between theory and practice as well as to illustrate the practical application of control theory through illustrative examples. It is the author's goal to write a

book that can be used to teach undergraduate and graduate classes in automatic control and nonlinear control at electrical, mechanical, and aerospace engineering departments. The book is also addressed to engineers and scholars, and the examples considered allow one to implement the theory in a great variety of industrial systems. The main purpose of this book is to help the reader grasp the nature and significance of multivariable control.

For many centuries Indian and Tibetan Buddhists have employed this collection of pithy, penetrating Dharma slogans to develop compassion, equanimity, lovingkindness, and joy for others. Known as the

lojong—or mind-training—teachings, these slogans have been the subject of deep study, contemplation, and commentary by many great masters. In this volume, Traleg Kyabgon offers a fresh translation of the slogans as well as in-depth new commentary of each. After living among and teaching Westerners for over twenty years, his approach is uniquely insightful into the ways that the slogans could be misunderstood or misinterpreted within our culture. Here, he presents a refreshing and clarifying view, which seeks to correct points of confusion.

The aim of this book is to present the sequential steps for developing the computer programs for the design

of electrical machines, using well-established design formulae. The data of magnetic and non-magnetic materials used in latest designs by industries, is applied for optimizing the design

With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required.

In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

The Conditions of Contract prepared by FIDIC are used extensively as the standard contract of choice in international construction and civil engineering projects. Engineers working on these projects need to be aware of these contracts, but as the forms are complex it can be difficult to draw together all the sub-clauses relating to a particular issue. The FIDIC Plant and Design-Build Forms of Contract Illustrated crystallizes the requirements of the FIDIC P&DB contract into a range of simple to follow flow charts, providing a clear and concise way to rapidly assimilate the requirements of each clause. The relationship between the various clauses in the contract, the concepts, process methods and actors

involved in each sub-clause are all easily seen, and key issues around each topic (such as periods allowed, notices, etc) are all documented. In addition, related sub-clauses and/or important additional documents are linked so that the reader has a full understanding of the wider implications of each clause.

Photographer's Guide to the Panasonic Lumix DC-ZS70/TZ90 is a complete guide to the use of the Panasonic Lumix DC-ZS70 camera, which is known as the TZ90 outside of North America. The book shows beginning and intermediate photographers how to capture excellent images and video sequences with

conditions. The book includes a full discussion of the video recording abilities of the ZS70 camera, which offers manual control of exposure and focus during movie recording, and provides ultra-high definition 4K recording of motion pictures. The book also explains the camera's features for extracting still images from 4K video and using the Post Focus and Focus Stacking features to produce sharply focused images after a shooting session. In three appendices, the book discusses accessories for the ZS70, including cases, power supply options, and other items, and includes a list of websites and other resources for further information. The book includes an appendix with helpful Quick Tips that explain how to take advantage
