Tips for drawing 3-D shapes. When trying to draw something 3-D, straight lines are important. Use a straight edge (like a ruler) when you can. Even if you don't have a ruler, something that's flat and made out of a sturdy material will do. Be aware of the angles of lines. Things like a cube, for instance, require parallel lines to give them ...

Right click it > Hit Format Shape... > 3D Format > open the top bevel drop down and select Circle This adds a round bevel to the edge of the circle, and by increasing the width and height (and keeping them equal) the bevel meets in the middle, making a hemisphere. Fill the circle with a decent colour to make the 3D effect more visible.
