This book takes a critical
approach to examining
British and Italian
occupational health and
safety enforcement policies
and questions the legal and
political principles that
underpin them. The book
undertakes a comparative
critical analysis of these
two jurisdictions' health
and safety regulatory
enforcement practices by
focusing on the causes and
consequences of the under-

criminalisation of these crimes. It explores the fundamentals of these two jurisdictions' criminal justice systems and political practices, policies and traditions and exposes how these translate into pragmatic social inequality and injustice for victims of occupational health and safety crimes and, more generally, citizens. Findings are drawn from qualitative interviews conducted with front line occupational health and safety enforcement officers. This book offers an account of the challenges encountered when attempting to scrutinise public

institutions responsible for policing crimes of the powerful. The comparison of the political and criminal justice system practices, polices and traditions of the British and Italian legal systems offer a valuable critical contribution to the anglophone literature on the subject and, more generally, on regulatory enforcement policies and practices.
