There is no better time to start a Small Engine Repair business than right now. With many of the older Technicians retiring from the industry, this has created a need for people with mechanical abilities to step in and maintain Outdoor Power Equipment. The Small Engine Repair business is a lot of fun and can be a money making business if you have the right plan, positive attitude and information to get you moving in the right direction. This book will provide a step by step guide to start your business. It will also show you tools that make your job much easier as well as marketing and sales methods to get your phone ringing. It will also help you avoid the pitfalls of this industry. Included are the secrets to finding the major suppliers and hard to find parts. This book covers opening and running your business from A to Z.Knowledge is power and having a proven business model to follow will jumpstart your business while other start-ups wonder what their next step will be. Let "Mark The Mechanic" show you how to grow a successful Small Engine Repair Business in your area!

A comprehensive manual covering everything you need to know about small engine repair and maintenance. Includes step-by-step instructions and hundreds of photos. All there is to know about Small Engine Repair for up to and including 5 HP engines: • Includes Briggs & Stratton, Honda, Sears Craftsman and Tecumseh • Maintenance • Repair • Troubleshooting Book Summary • Tools and equipment • Shop practices and safety • Shop practices and safety • Tune-up and maintenance procedures • Carburetor adjustment and overhaul • Ignition system servicing • Recoil starter repairs • Repair and overhaul instructions • Comprehensive specs Table of Contents Introduction Chapter 1: Setting up shop Chapter 2: General shop practices Chapter 3: Troubleshooting Chapter 4: Tune-up and routine maintenance Chapter 5: Repair procedures common to all engines Chapter 6: Briggs & Stratton engines Chapter 7: Tecumseh/Craftsman engines Chapter 8: Honda engines

If there is one thing Ford enthusiasts have learned over the years, deciphering which Ford parts work with which Ford engines is a far more difficult task than with many other engine families. Will Cleveland heads fit on my Windsor block? Can I build a stroker motor with factory parts? Can I gain compression by using older-model cylinder heads, and will it restrict flow? Is there a difference between Windsor 2-barrel and 4-barrel heads? These are just a few examples of common questions Ford fans have. These and many other questions are examined in this all-new update of a perennial best seller. Thoroughly researched and, unlike previous editions, now focused entirely on the small-block Windsor and Cleveland engine families, Ford Small Block Engine Parts Interchange includes critical information on Ford's greatest small-block engines and goes into great detail on the highly desirable high-performance hardware produced throughout the 1960s, 1970s, and 1980s. By combining some of the best parts from various years, some great performance potential can be unlocked in ways Ford never offered to the general public. Following the advice in Ford Small-Block Engine Parts Interchange, these engine combinations can become reality. You will find valuable information on cranks, blocks, heads, cams, intakes, rods, pistons, and even accessories to guide you through your project. Author George Reid has once again done extensive research to accurately deliver a thorough and complete collection of Ford small-block information in this newly revised edition. Knowing what internal factory engine parts can be used across the wide range of production Ford power plants is invaluable to the hot rodder and swap meet/eBay shopper. Whether building a stroker Cleveland or a hopped-up Windsor, this book is an essential guide.

More people than ever are considering starting a home-based business. Part of this interest in home-based businesses is driven by an economic recession, but part of it is also driven by the dream of independence.For many people, being self-employed or operating their own home-based business has always been a dream. Leaving the corporate world behind, eliminating long commutes to work, spending more time at home with family, and a desire for a simpler lifestyle have all been listed as reasons why people decide to trade the supposed security of a corporate job for a home-based business. There are many reasons to start a home-based business. In fact, there are probably about as many reasons as there are small business owners! Starting a small business is hard work, but it is also rewarding work. Working for yourself also provides a measure of security and flexibility not available in any job. How much security and how much flexibility depends on the type of business you operate, as well as your motivation and determination to succeed.Home-Based Businesses That You Can Start Today will help you get started on the exciting journey toward being a small business owner. This book is filled with small business ideas that can be started right from your own home with minimal expense or hassle. Each business idea is neatly organized into its own section so you can skip over any business ideas that do not sound appealing and focus on those that you do find interesting.Home-Based Businesses That You Can Start Today focuses on providing ideas to get you started. This book profiles 65 different business ideas that you can start at home.I trust you will find Home-Based Businesses That You Can Start Today to be a valuable resource as you consider starting your own small business. The list of business ideas that is included in this book is by no means exhaustive or comprehensive, but it does provide a good overview of the many types of home-based businesses that can be operated today.

Contractor-operated base stores, once envisioned as a practical and cost-effective means for obtaining vehicle repair parts and civil engineering supplies, are now plagued by pricing irregularities, contract abuses, and repeated allegations of fraud. GAO reviewed such contractor-operated stores to determine how well these contracts are controlled and whether they are subject to fraud and abuse. The review concentrated on evaluating Air Force contracting and management procedures developed to implement the contractor-operated store, reviewing audit reports and closed criminal investigation reports from the Air Force, and reviewing 10 out of 120 Air Force store contracts in operation. Despite past concentrated efforts, the Air Force has been unable to develop a workable store contract for purchasing the thousands of low-cost, commercial items that its bases need daily. Further, the services continue to award complex, fixed-price store contracts containing many pricing uncertainties. The burden of administering these contracts has often been slighted in favor of relying on a contractor to price and deliver goods according to the contract, resulting in some contractors taking advantage of the uncertain contracts and disorganized management. Air Force bases have paid more for automobile parts than the lowest price specified in the contract and have purchased new parts when more economical, rebuilt parts should have been stocked. They have also contracted to pay excessive fixed prices for civil engineering supplies. These unsound buying practices and abuses were traceable to defects in the contracts and breakdowns in internal controls. Since 1977, the Air Force has made 41 criminal investigations of alleged store irregularities. These cases have primarily involved the misrepresentation of goods in order to increase prices and have usually involved a relatively small dollar amount. GAO believes that the contractor-operated store, as implemented, unnecessarily exposes the Government to potential purchasing fraud and abuse because it depends too heavily on the contractor to make the buying decisions. GAO also believes that some aspects of the store contracts are uncontrollable and will continue to result in the Government paying higher prices than is necessary.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

In my opinion, unless you're a total introvert, agoraphobic, disabled or too lazy to leave the house, your best bet to buy most things you need is locally. Go to the Yellow Pages, read your local newspapers, drive around the shopping areas, go to local free ad websites and talk to people you know about what you need. I generally buy most of my stuff from the big department stores but if I need something like furniture, I'll check out the furniture stores on the poor side of the town because the prices for the same goods are often much cheaper than a store in the higher class part of town plus you can often haggle with the owner on a cash deal. By shopping on the poor side of town at supermarkets for food, you can often save several dollars on a load of groceries. Beyond that, I generally go to the thrift stores a few times a year to buy t-shirts, clothes and anything else that strikes my fancy as I look around.
