Sudden death syndrome (SDS) is a loosely defined umbrella term for a series of cardiac syndromes that cause sudden cardiac arrest and possibly death.. Some of these syndromes are the result of ...

~~Sudden Death Syndrome: Infants, Adults, Causes, Prevention ...~~

Sudden cardiac arrest is not a heart attack (myocardial infarction). Heart attacks occur when there is a blockage in one or more of the coronary arteries, preventing the heart from receiving enough oxygen-rich blood. If the oxygen in the blood cannot reach the heart muscle, the heart becomes damaged. In contrast, sudden cardiac arrest occurs when the electrical system to the heart malfunctions and suddenly becomes very irregular. The heart beats dangerously fast.

~~Sudden Cardiac Death (SCD): Symptoms, Causes~~

Prevent blood clots, which can lead to heart attack or stroke. Prevent or delay the need for a procedure or surgery, such as angioplasty or coronary artery bypass grafting. Reduce your heart's workload and relieve heart disease symptoms. Take all medicines regularly, as your doctor prescribes.

~~Sudden Cardiac Arrest | NHLBI, NIH~~

Sudden arrhythmic death syndrome, or SADS, is when someone dies suddenly following a cardiac arrest and no obvious cause can be found. This affects around 500 people in the UK every year. We know that, in many cases, this is caused by an inherited heart condition and the person's immediate family should be referred to a specialist genetics centre for assessment.

Sick sinus syndrome (SSS), also known as sinus node dysfunction (SND), is a group of abnormal heart rhythms (arrhythmias) presumably caused by a malfunction of the sinus node, the heart's primary pacemaker. Tachycardia-bradycardia syndrome is a variant of sick sinus syndrome in which the arrhythmia alternates between slow and fast heart rates. ...

~~Sick sinus syndrome - Wikipedia~~

Immediate CPR is crucial for treating sudden cardiac arrest. By maintaining a flow of oxygen-rich blood to the body's vital organs, CPR can provide a vital link until more-advanced emergency care is available. If you don't know CPR and someone collapses unconscious near you, call 911 or emergency medical help.

~~Sudden cardiac arrest - Diagnosis and treatment - Mayo Clinic~~

The survival benefit of ICD therapy in the secondary prevention of sudden death was primarily observed in patients with significantly reduced left ventricular function (left ventricular ejection fraction  $\leq$ 35%).

~~Secondary prevention of sudden cardiac death - Heart Rhythm 02~~

The Unexplained cardiac death project is an Australian research project that aims to prevent deaths due to sudden cardiac arrest. The project is collecting key information about people aged 1–50 years who have been affected by sudden cardiac arrest.
