When can government "take" private property for a "public purpose"? Can private property owners obtain restitution for partial takings and business damages? This manual is a comprehensive treatment of current legal practice, including detailed review of proceedings from both the condemnor's and condemnee's perspective. Highlights of the latest edition: • Discussion of: • practical considerations for ongoing negotiations during trial possible amendment to jury instruction re: business damages (qualified partial taking/relocation) • FDOT's incentive program to reduce project time and cost • IRS's interpretation of facts re: replacement property/period, expenses incurred in defense of condemnation proceeding, and "rental" income generated by temporary condemnation • Revisions to: • list of statutes authorizing or limiting power of eminent domain • checklist for initial client conference • Bert J. Harris, Jr., Private Property Rights Protection Act • Fla.R.Civ.P. 1.525 re: taxing fees and costs • inverse condemnation discussion • New case law addressing issues such as: • substantive and procedural due process and equal protection • prejudgment interest in inverse condemnation cases • bad faith actions to improve property in order to enhance award • compensation for taking of trees and crops • whether Uniform Relocation Assistance Act provides private right of action for money damages • Updated forms, and new forms for mediated settlement agreement for fees and costs, and case management order for complex eminent domain litigation This eBook features links to Lexis Advance for further legal research options.

This advanced textbook on modeling, data analysis and numerical techniques for marine science has been developed from a course taught by the authors for many years at the Woods Hole Oceanographic Institute. The first part covers statistics: singular value decomposition, error propagation, least squares regression, principal component analysis, time series analysis and objective interpolation. The second part deals with modeling techniques: finite differences, stability analysis and optimization. The third part describes case studies of actual ocean models of ever increasing dimensionality and complexity, starting with zero-dimensional models and finishing with three-dimensional general circulation models. Throughout the book hands-on computational examples are introduced using the MATLAB programming language and the principles of scientific visualization are emphasised. Ideal as a textbook for advanced students of oceanography on courses in data analysis and numerical modeling, the book is also an invaluable resource for a broad range of scientists undertaking modeling in chemical, biological, geological and physical oceanography.

We live on a dynamic Earth shaped by both natural processes and the impacts of humans on their environment. It is in our collective interest to observe and understand our planet, and to predict future behavior to the extent possible, in order to effectively manage resources, successfully respond to threats from natural and human-induced environmental change, and capitalize on the opportunities " social, economic, security, and more " that such knowledge can bring. By continuously monitoring and exploring Earth, developing a deep understanding of its evolving behavior, and characterizing the processes that shape and reshape the environment in which we live, we not only advance knowledge and basic discovery about our planet, but we further develop the foundation upon which benefits to society are built. Thriving on Our Changing Planet presents prioritized science, applications, and observations, along with related strategic and programmatic guidance, to support the U.S. civil space Earth observation program over the coming decade.

Introducing students to the issues, problems, perspectives and personalities of Western philosophy, this text is organized around four key questions in philosophy: reality, knowledge, God and morality.

When can government "take" private property for a "public" purpose? Can private property owners obtain restitution for partial takings and business damages? This manual is a comprehensive treatment of current legal practice, including detailed review of proceedings from both the condemnor's and condemnee's perspective. In addition to updated rules, statutes and recent case law, the latest edition offers. A new section on takings by utilities under federal law; nuisance abatement; interstate pipeline condemnation in federal court; vagueness; and motions in limine, motions for summary judgments, and motions to strike New material related to trial preparation, severance damages, easements, recurrent flooding, and regulatory takings Rewritten on project development and the environment; expert testimony; voir dire, the Bert Harris Act; substantive and procedural due process; equal protection; and statute of limitations Updated material on defenses; motions to amend; curing defects; appellate review; property valuation; nonmonetary benefits; and environmental concerns Elimination on public purpose; necessity; compliance to sustain a petition for condemnation; order of taking in inverse condemnation; appellate review; settlement negotiations; witness testimony; and mediation process
